

## GOAL : Impress Big time! Get Job!

Name

Go thru reqs doc and email to make sure it's aligned and or if it wouldn't inspire me to quickly make it 100%  
check the data from provided URL

Folder Structure

Create project

Define pods

Create initial README.md

setup Git

Simple... simple... simple

REVIEW JUDGING CRITERIAS

Come up with basic UI Mocks

VIPER 1.0

Add base

Create new files one by one ... arguably not good but for this note as I do `://FIXME` and `://TODO`

Commit + PR to Dev

Go thru reqs doc and email to make sure it's aligned and or if it wouldn't inspire me to quickly make it 100%

Create new branch

Entity

Commit + PR to Dev

Create new branch

Network layer

Commit + PR to Dev

Create new branch

Master

Commit + PR to Dev

Create new branch

Create master cell - ideally with cityscape BG

Commit + PR to Dev

Create new branch

Add Pull 2 Refresh
Commit + PR to Dev
Create new branch

Commit + PR to Dev
Create new branch
Settings+FeatureComplete
Commit + PR to Dev
Go thru reqs doc and email to make sure it's aligned and or if it wouldn't inspire me to quickly make it 100%
REVIEW JUDGING CRITERIAS
TODOs and FIXMEs
Remove unused code (ie look at extensions, etc...)
doc
Look for instance of forced unwrap and fix
Final adjustments
UT time permits
Copy this list to the PM folder
Review README.md
Deliver By Sunday 20:00 EDT

assets; requirements; etc
a copy of this list
UI mocks
lottie
merge to master
Add jbdtk
create branches for each part :
list has 3 items. Current location (if perms are granted) + Tokyo + London
each cell must also show
each cell must show wind + cloud
API is openweathermap.com
json return should look like :
base address for icons is :
<a href="https://cocoacasts.com/how-to-add-pull-to-refresh-to-a-table-view-or-collection-view">https://cocoacasts.com/how-to-add-pull-to-refresh-to-a-table-view-or-collection-view</a>
